

Geoffrey Mwangi Muthoni

Frontend Developer (Next.js · React · TypeScript) | IT Lead | AI & Automation Specialist

gmwangi3174@gmail.com | +254 708 760017 | Nairobi, Kenya | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Results-driven Frontend Developer and IT Lead with 4+ years of experience building responsive, data-driven web applications using Next.js, React, TypeScript, and Tailwind CSS (shadcn/ui). Currently spearheading digital infrastructure and internal tool development at Mwango Capital, including automated NSE data pipelines powering real-time financial dashboards. Google AI Professional Certificate holder and Anthropic Claude AI practitioner with hands-on experience integrating AI into development workflows using Cursor, n8n, and Google Apps Script. Proven track record of delivering automation solutions that reduce manual workload, improve data accuracy, and accelerate decision-making in finance and operations contexts.

CORE TECHNICAL SKILLS

Frontend:	Next.js (App Router), React, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, HTML5, CSS3
Backend & DB:	Supabase (PostgreSQL, Auth, RLS, Edge Functions), REST APIs, Node.js, Google Apps Script
AI & Automation:	Claude AI (Anthropic), Google Gemini, Cursor IDE, n8n, ChatGPT, Prompt Engineering, AI-assisted coding
Data & Analytics:	Google Sheets API, NSE data scraping & pipelines, financial dashboard automation, data reporting
DevOps & Tools:	Git, GitHub, Vercel, VS Code, Cursor, IoT platform management, NTSA systems
Administration:	IT systems implementation, office & asset administration, payroll, accounts management

PROFESSIONAL EXPERIENCE

IT Lead & Frontend Developer | Mwango Capital, Nairobi Dec 2025 – Present

- Architect and maintain internal web applications and dashboards using Next.js (App Router), TypeScript, Tailwind CSS, and Supabase.
- Built automated NSE (Nairobi Securities Exchange) data scraping pipelines that feed live financial data into Google Sheets, powering real-time investment dashboards.
- Integrate AI tools (Claude, Cursor) into development workflows, reducing build time and improving code quality across the team.
- Lead IT infrastructure decisions, vendor management, and technology adoption across the organisation.
- Design and implement automation workflows using n8n and Google Apps Script to streamline operational processes.

Frontend Developer & Customer Care Head | Jendie Automobiles Ltd, Nairobi Jun 2022 – Nov 2025

- Designed and implemented dynamic, responsive websites using React, Next.js, and Tailwind CSS, improving page load performance by optimising component architecture.
- Developed interactive UI components and improved site navigation flow, directly increasing user engagement and customer satisfaction.
- Managed IoT platform accounts (activations/suspensions), coordinated NTSA inspection code issuance, and supported nationwide compliance operations.
- Launched new website features resulting in measurable increases in user engagement; streamlined client service processes to reduce turnaround time.
- Administered agent accounts on IoT and NTSA platforms, ensuring regulatory compliance across all client operations.

Business Support Executive – Data & Technology | Various Organisations, Nairobi & Nyeri 2018 – 2021

- Delivered data management, administrative, and technology support across government offices, retail, and NGO sectors.
- Built comprehensive data management and automated reporting systems, improving accuracy and saving significant team hours per week.
- Implemented stock management IT systems and trained staff, improving operational efficiency and reducing manual errors.
- Captured, analysed, and managed organisational data to support strategic decision-making.

Asset Administrator & Office Support | Alma Kilifi Properties & Nyali Capital Ltd, Kenyan Coast 2015 – 2018

- Managed rental property and office administration including accounts payable/receivable, payroll processing, and contract preparation.
- Prepared detailed business and financial reports for management review; improved overdue account recovery through systematic follow-up processes.
- Enhanced payroll processing efficiency through system improvements, reducing processing time.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Google AI Professional Certificate

Apr 2026

Google / Coursera • 7 courses: AI Fundamentals, AI for Brainstorming & Planning, AI for Research & Insights, AI for Writing & Communicating, AI for Content Creation, AI for Data Analysis, AI for App Building • Built 20+ AI artifacts; vibe-coded a custom AI solution.

Verify: coursera.org/verify/professional-cert/ELAAW3EP9ZN7

Anthropic Claude AI – Prompt Engineering & AI Integration

2025 – 2026

Completed Anthropic's Claude AI courses; proficient in prompt engineering, AI-assisted development, and responsible AI usage for real-world workplace automation and content generation.

Cursor AI-Powered IDE

2025 – Present

Proficient in Cursor IDE for AI-assisted coding, code generation, and intelligent refactoring within Next.js/TypeScript projects.

Certificate in Web Development

2021

Udemy – HTML, CSS, JavaScript, React fundamentals.

EDUCATION

Certificate in Life Skills, Business Management & Technology

2014 – 2018

KEPSA Youth Program

Kenya Certificate of Secondary Education (KCSE)

2006 – 2011

Matuu High School

KEY PROJECTS

- **NSE Data Pipeline:** NSE Financial Dashboard Automation – Built a live data pipeline scraping Nairobi Securities Exchange market data into Google Sheets, powering automated investment dashboards for Mwango Capital.
- **Internal Tooling:** Internal Investment Tools (Next.js + Supabase) – Developed internal dashboards and tools for financial data management, portfolio tracking, and reporting using Next.js App Router, TypeScript, and Supabase.
- **Automation:** Workflow Automations (n8n + Google Apps Script) – Designed and deployed automated workflows eliminating manual data entry and reducing operational overhead.
- **AI Integration:** AI-Assisted Development – Integrated Claude AI and Cursor into daily development workflow, building AI-augmented features and improving code review speed.
